

Outreach Offshore Ltd – Spare Parts Communication

COVID-19 OUTBREAK

As a customer or potential customer of Outreach Offshore Limited (OOL), we would like to take this opportunity to thank you for your valued custom and inform you that currently we are still fully operational. However, we are expecting to encounter serious supply difficulties in the coming weeks due to the COVID-19 outbreak. Our aim is to keep your equipment operational and certified for use in these difficult times.

As a supplier of Palfinger Parts and equipment, we would strongly advise that you consider reviewing any parts stock or parts requirements you may have, at a view to early purchase.

Outreach are also a key supplier of Launch & Recovery Systems (LARS), Electric & Hydraulic Winches, and ROV Control Cabins and Workshops and equipment. Again, we would strongly advise that you consider reviewing any parts stock or parts requirements you may have, at a view to early purchase.

As you are aware the OOL Parts Team can provide a comprehensive range of spare parts to meet the needs of your equipment's operational capability. As the UK's approved supplier of Palfinger Crane Parts, you can be assured that any parts, supplied by OOL, are genuine OEM parts. We are also able to source other spare parts and marine equipment to provide additional support.

As a solutions provider, we have identified the need to retain definitive spares packages to minimise downtime in the event of a breakdown. Spare parts are essential for keeping equipment functioning, however, the locality and availability is key to your equipment's continuous operation.

During the current COVID-19 crisis, OOL strongly recommends that customers address their stock of parts that regularly need replacing, or indeed critical parts which are essential to safe lifting operations and continued operational capability.

As the Palfinger UK dealer and R.O.V LARS equipment manufacturer, we can offer these parts, to our valued customers, at competitive prices. Please do not hesitate to contact us to discuss what packages or parts you require. Discounts may be available for bulk orders.
